- Direct customer support to resolve incidents and facilitate project work-flows
- New technology analysis
- Internal training support
- 24x7 On-call planning and provisioning

November 2006 Employee of the Month

Senior Analyst Programmer Bradley Dean has impressed colleagues with his great work on a major client account. Bradley is always seeking improvements to the IT process: as well as his own proactive work in this area, he handles any suggestion or request promptly and without fuss. Bradley makes himself available no matter how busy he might be and is consistently polite and friendly under the toughest pressure and most unreasonable demands. He is persistent in his approach to problem-solving and works hard to achieve satisfactory client outcomes.

PROFESSIONAL EXPERIENCE

Web Applications Developer / Software Engineer

The University of Melbourne

Melbourne, VIC

2000 - 2006

- Project/System Planning and Development of Enterprise Systems:
 - Teaching and Learning Systems
 - Directory Services (LDAP, HTTP forms)
